1. Notes

Please note that a modified XSD version 2.0 will be published in due time before the implementation, with an addition to the previously restricted enumeration TyreTypeCodes. As soon as this is ready you will be informed. We've received a lot of questions on the earlier decided restrictions of these codes.

2. eCOC website

An option has been added to generate a PDF file. It's a first draft version and will be optimized the coming weeks. Suggestions are welcome.
